AGRONOMY

Golf Course Superintendent: Matt Gourlay, CGCS

PGA TOUR Agronomist: Thomas Bastis

Following a relatively typical winter and a slightly warmer-than-average spring, Hillcrest Country Club enters the 2025 event in excellent agronomic condition. The bentgrass/*Poa annua* greens are dense, firm, and healthy—expected to deliver smooth, consistent putting surfaces that match or exceed previous years' standards. The cool-season turf in the tees, fairways, and rough exhibits strong density and uniform coverage, supported by solid root development and proactive conditioning throughout the spring.

Ongoing refinement of the irrigation system and continued tree canopy management have helped optimize light, airflow, and moisture distribution across key playing areas. The club's attention to detail is evident throughout the property, reflecting a strong agronomic program and daily commitment to tournament-level conditions.

Quick Facts:

- Greenspeed will be in the 12+' range, as weather conditions allow.
- Tees and approaches will be mowed at 0.425".
- Fairways will be mowed at 0.450".
- Intermediate rough will be mowed at 1.50", and the primary rough will be maintained at 3+
