AGRONOMY

Director of Golf Course Maintenance Operations: Kevin Malloy

PGA TOUR Agronomist: Mark Johnson

TPC Colorado has emerged slowly from winter dormancy and will require warmer temperatures and filling-in before it can be well-positioned for the event. The large T-1 bentgrass greens have good coverage and are expected to produce firm conditions with high-quality ball roll characteristics. The blue/ryegrass tees and fairways possess some isolated winter damage that should have no problem recovering over the next few weeks and should also provide firm playing conditions. All closely mown areas will be maintained like in previous years. Course enhancements include a rock wall behind #8 green and a new tee on hole #10.

Quick Facts:

- The target greenspeed will be 11.0', dependent upon wind.
- The tees and fairways will be mowed at 0.400".
- The intermediate rough will be mowed at 1.0", and the primary rough will be maintained at 3.0".
