AGRONOMY

Golf Course Superintendent: Brandon Razo

PGA TOUR Agronomist: Tim Connolly

The Hale Irwin-designed Panther Creek Country Club is in good condition as it prepares to host the 10th Memorial Health Championship presented by LRS. The greens are a mix of Penncross creeping bentgrass and *Poa annua*. As soil temperatures rise throughout June, the colors of these two grass species will meld together nicely, and we should have true and smooth surfaces for the competition. The Penneagle tees and fairways are also in good condition. Since last year's tournament, the second phase of a fairway reduction project was completed on the front nine as the club converted an additional 3.5 acres of fairways into newly established tall fescue rough. The rough throughout the course is healthy and will provide interest for the competition if Midwest rains linger into mid-June. A new professional tee on #14 was recently resodded and should be ready for this year's tournament.

Quick Facts:

- The target greenspeed will be 12.5 feet.
- The tees, fairways, and approaches will be mowed at 0.400 inch.
- The intermediate rough will be mowed at 1.5 inches, and the primary rough will be maintained at 3.5 inches.
