Extended forecast – A slow moving storm system is expected to impact the area Wednesday night and Thursday before moving out of the area Friday morning. There are multiple waves of rain expected leading to 2-4" across the area. Relief will come Friday and through the weekend with dry conditions and mostly/partly cloudy skies. Winds will increase with the approaching storm system with wind gusts in the mid-upper 20s throughout the week and then slightly lower through the weekend, but winds will turn to the north-northeast behind the rain. Temperatures will cool off as well reaching the upper 70s to near 80F each afternoon and cooling off into the low 60s overnight.
