Today – There is a slight chance for a shower this morning, especially to the west. Otherwise, It will be a battle once again to scour out the clouds as the NE to ENE wind flow continues to push low-level moisture into the area. Drier air is expected to mix into the region as we go through the day helping to provide more breaks in the overcast and allow for more sunshine than yesterday. Mostly cloudy to a mix of sun and clouds can be expected today with highs in the upper 70s.
